

Digital Marketing Strategy Document: Mahendras Online Growth Plan

Introduction

Mahendra's Educational Private Limited is already a highly trusted brand for offline government exam coaching in India. However, to grow the online platform and compete with new-age edtech companies, a strong digital marketing plan is required.

This document outlines a complete digital marketing strategy to bring more traffic to the website, turn casual visitors into paying students, and build a massive online community. The plan focuses on four main pillars: Search Engine Optimization (SEO), Social Media Marketing, Paid Advertising, and Lead Nurturing.

Part 1: Search Engine Optimization (SEO) Strategy

The website already gets good traffic from Google search, but this traffic must be multiplied and directed toward course conversion pages.

1. Target Keywords and Content Creation

- **High-Intent Keywords:** Informational articles must be created around keywords like "best online coaching for SBI PO," "SSC CGL live classes," and "IBPS Clerk mock test pack."
- **Daily Exam Updates:** The Update Hub must publish official exam notifications, syllabus changes, admit card download dates, and exam day guidelines within minutes of the official release to capture immediate search traffic.
- **Educational Material:** The site must continue publishing high-quality daily current affairs, vocabulary lists, and short math tricks.

2. On-Page SEO and Link Optimisation

- **Internal Linking:** Every free study blog must link directly to a related paid product page. For example, a blog post about banking English tips must contain text links to the Premium Bank Video Course.
- **Meta Descriptions and Titles:** All pages must use clear, catchy titles that show the current year (e.g., "SBI PO Syllabus 2026: Download PDF Syllabus").
- **Image Optimization:** All blog images and banner graphics must use alt-text containing target keywords to rank well in Google Image Search.

Part 2: Social Media Marketing Plan

Social media will be used to build trust, showcase top teachers, and share student success stories.

1. YouTube Strategy (The Primary Learning Channel)

- **Daily Free Live Sessions:** Faculty members will conduct daily 30-minute live classes solving previous year question papers for upcoming exams like SSC and Bank.
- **Shorts for Quick Tricks:** Short 60-second video clips will be uploaded daily to show quick math shortcuts, reasoning tricks, and vocabulary building.
- **Exam Analysis Videos:** Immediate live analysis sessions will be broadcasted on exam days as soon as students walk out of the exam halls to discuss difficulty levels and expected cut-off marks.

2. Instagram and Telegram Strategy (Community and Engagement)

- **Daily Quizzes on Instagram Stories:** Multiple-choice questions on general knowledge and current affairs will be posted daily to keep aspirants engaged.
- **Telegram Channel Distribution:** A dedicated Telegram channel will distribute daily free PDF notes, quiz links, and immediate batch announcements directly to students' mobile phones.
- **Student Success Reels:** Short video interviews of students who cleared their exams using Mahendras Online will be highlighted to provide strong social proof.

Part 3: Paid Advertising and Remarketing Funnels

Paid ads will be used to bring immediate traffic to new online batches and bring back students who left the website without purchasing.

1. Google Search and Display Ads

- **Search Ads for Active Searchers:** Google Search Ads will target users who are actively searching for terms like "buy bank test series online" or "join online coaching for SSC."
- **Display Ads on Educational Sites:** Visual banner ads showcasing new batch start dates and discount offers will be displayed on popular educational news sites and job alert portals.

2. Meta and YouTube Remarketing Funnels

- **The Visit Tracker:** Tracking codes (pixels) will be placed on high-traffic pages like the Daily Current Affairs blog.

- **Targeted Ad Delivery:** Visitors who read the current affairs blog but do not buy a course will see specific ads on Facebook and Instagram within 24 hours. These ads will offer a 10% discount coupon code for the Daily Quiz Pack.
- **Video Retargeting on YouTube:** Users who watch free YouTube classes will be shown video ads promoting the structured, full-length live batches.

Part 4: Lead Nurturing and Conversion Tactics

Once a student shares their contact information via a free quiz or PDF download, regular communication will guide them toward buying a course.

1. WhatsApp and SMS Marketing

- **Immediate Welcome Message:** As soon as a student signs up, an automated WhatsApp message will deliver the promised free PDF study material along with a link to watch a demo class.
- **Weekly Exam Alerts:** Regular SMS updates will notify leads about upcoming application deadlines, followed by a recommendation to join the relevant preparation batch.
- **Flash Sale Notifications:** Short, urgent text messages will be sent during festival offers (e.g., "Flat 50% off on all SSC Test Series — Valid only till midnight!").

2. Email Marketing Campaigns

- **The Educational Welcome Sequence:** A series of 5 automated emails will be sent over the first week, sharing free study tips, introducing top subject experts, and explaining the benefits of online learning.
- **Doubt-Solving Highlights:** Weekly emails will highlight how online students get their doubts cleared by teachers, addressing the biggest fear of online learners.

Part 5: Implementation Timeline and Budget Allocation

The execution of this digital marketing strategy will follow a structured monthly setup and optimization plan.

1. 4-Week Launch Timeline

- **Week 1 (Setup and Tracking):** Install ad tracking codes on the website, set up automated WhatsApp tools, and plan the social media content calendar.
- **Week 2 (Content and Organic Launch):** Begin publishing SEO-optimized blogs, start daily Instagram quiz stories, and launch the Telegram PDF distribution channel.

- Week 3 (Paid Campaign Activation): Launch Google Search Ads and activate Meta remarketing ads for website visitors.
- Week 4 (Review and Optimization): Check which ads and keywords are bringing the most course sales, pause low-performing campaigns, and increase the budget for top-performing ads.

2. Budget Allocation Estimate

- Paid Retargeting Ads (Meta & YouTube): 40% of the total digital budget.
- Google Search Ads (High-Intent Keywords): 30% of the total digital budget.
- Content Creation (Videos, PDFs, Blogs): 20% of the total digital budget.
- Automation Tools (WhatsApp & Email Software): 10% of the total digital budget.
